## HISTORICAL SKETCH

---

By an act of the Pennsylvania State Legislature passed in the year 1886, the Counties of Clarion, Forest, Jefferson, McKean and Warren were separated from the Eighth Normal School District and were constituted as the Thirteenth District. The necessary steps were at once taken to organize a Normal School. Contributions and pledges of money, amounting to forty thousand dollars, were obtained for the purpose of securing a suitable site and erecting the necessary buildings. This amount was supplemented by a legislative appropriation of twenty-five thousand dollars. The grounds and buildings which had belonged to Carrier Seminary were purchased from the Erie Conference of the Methodist Episcopal Church. Additional land adjoining the original purchase was obtained, and in the fall of 1886, work was begun on the erection of two commodious dormitories. These buildings were completed before the middle of February. A committee representing the State officially approved the provisions thus made for carrying on the work of a Normal School, and the institution was formally opened on the twelfth day of April, 1887. The school continued under the joint control of the State and the stockholders until February 9, 1916, when the State purchased all the outstanding stock and formally took over the property in the name of the Commonwealth.

## LOCATION

The Clarion State Normal School is located at Clarion, the county seat of Clarion County, Pennsylvania. The town is situated on an eminence about 1500 feet above the sea level overlooking the Clarion River. The natural scenery of the vicinity is picturesque and the healthfulness of the situation is unexcelled. The Borough which has a population of about 3500, is supplied with an abundance of natural gas, and pure spring water; the streets are paved, and lighted by electricity. The churches are excellent and the people intelligent and refined. In fact, Clarion is an ideal place for an institution of learning.

## RAILROAD FACILITIES

The school may be reached by means of the Baltimore & Ohio Railroad, Pittsburgh & Western Division, which has a station at Clarion Junction, from which a line of autos runs to Clarion and the Normal School. The Lake Erie, Franklin & Clarion Railroad connects Clarion with Summerville, a station on the Low Grade Division of the Pennsylvania Railroad. By means of this road Clarion may be reached from the Allegheny Valley Railroad via Redbank Junction and Summerville, and from the Philadelphia & Erie Railroad via Driftwood from Summerville. The Franklin & Clearfield branch of the New York Central Lines connects with the Lake Erie, Franklin & Clarion at Sutton Junction. By means of this connection Clarion may be reached from Titusville, Oil City, Franklin and other points to the west and north, and from Clearfield, DuBois, Falls Creek, Brookville and other points to the east. The Clarion station is located within a half square of the girls' dormitory, across the street from the Normal Laundry and Power House.

## AUTOMOBILE ROADS

With the opening of the Lakes to the Sea Highway, Clarion is connected by improved automobile roads with Pittsburgh, Butler, the Beaver and Shenango Valleys, Franklin, and Oil City; also with Brookville, Reynoldsville, Du Bois, Clearfield, and Tyrone. Other points east may be reached by way of the William Penn Highway.

Well kept state roads radiate in all directions from Clarion, and it is the opinion of tourists that the scenery is the equal in beauty and variety of that to be found anywhere in Pennsylvania.

## FACULTY

Equipment, buildings, and apparatus count for much in an institution of learning, but the most potent influence is personality. The strongest influence in a normal school is its faculty. It is the policy of this school to devote more time, attention and money to the upbuilding and maintenance of a capable faculty than to any other of the factors which enter into the composition of a normal school. The demands made upon its faculty are large and the standards set for them are high. To be a teacher requires special qualifications and preparation.

1. *Character* above everything else in the equipment of a Normal School instructor stands first. All other attributes combined cannot take its place.

2. *Ability to teach.* Ability to teach means inspiration to the members of a class. What and how the instructor does is vastly more influential than any other form of instruction that may be given.

3. *Culture and refinement of manner*, purity of speech, and neatness of dress give tone to the entire personality.

4. *Scholarship*, liberal in its comprehensiveness and special where it deals with the training of teachers, are demands which can be fairly made of the modern instructor.

5. *The spirit of co-operation* and the ability to work harmoniously with one's colleagues is an attribute without which an instructor will be greatly hampered.

## APPOINTMENT COMMITTEE

The wisdom of establishing the Appointment Committee has been amply justified by successful experience. The work of this committee has two distinct purposes in view, namely:

1. To assist worthy alumni and students of the Normal School to find suitable positions.

2. To aid school officials who desire trained young men and women as teachers.

All alumni and others who have been students here have a claim upon this institution. The Normal School is maintained by the state to prepare teachers for the public schools, and it is its duty to bring inquiring school officials into communication with desirable teachers.

Upon enrolling, candidates furnish all necessary personal data together with a list of references, including members of the faculty, former teachers and other business and professional people from whom the committee receives confidential information. The recommendations based upon all available information always conservative, thus affording a double advantage to both students and school authorities.

All those who wish the co-operation of the school in this matter are urged to enroll. Blanks for this purpose will be furnished upon application. This committee is maintained by the

*Reception Room—Navarre Hall*

school without charge to the candidate or school officers. All schools desiring teachers are urged to communicate with the committee.

## GROUNDS AND BUILDINGS

The grounds comprise twenty-three and one-fourth acres, within the limits of the Borough of Clarion. They have been laid out with care and are kept in excellent condition. The buildings all front upon a handsome lawn ornamented with shade trees and evergreens. All the buildings are heated by steam, lighted by electricity, and are supplied with the other conveniences of modern living.

*Seminary Hall* is a three-story brick building originally occupied by Carrier Seminary, from which it derives its name. Here are found the offices, school store, post office, library, six large class rooms and, on the third floor, a dormitory for men.

*Music Hall*, a two-story brick building, provides a studio for the Director of Music, instruction and practice rooms on the first floor, and living rooms for the Principal's family on the second floor.

*Science Hall*, a three-story brick building, provides for laboratories, class rooms, Training School, Domestic Science, Manual Training, and a dormitory for women.

*The Chapel* is a beautiful stone building with a gymnasium in the basement, and on the main floor an auditorium with a normal seating capacity of eight hundred.

*Stevens Hall* is a three-story building with apartments for teachers and provisions for lodging two hundred women students. There are bath rooms with plunge and shower baths on each floor. The rooms are conveniently arranged, well lighted and comfortably furnished. The splendid new cafeteria is located on the first floor of this building.

*Navarre Hall*, the new dormitory for young ladies, is one of the finest and most up-to-date Normal School buildings in the country. It is the modern Spanish type of architecture and is constructed of stone, brick, concrete and iron, with a tile roof and is fire-proof throughout. On the upper floors are found accommodations for teachers and pupils including parlor and trunk rooms on each floor. Each room is neatly furnished, lighted by electricity, heated by steam, and has a stationary washstand supplied with hot and cold water. Bath rooms with

running water are found on each floor. The building also contains apartments for the servants entirely separate from the main dormitory, although under the same roof. An elevator in the rear of this building provides for the easy handling of trunks and heavy baggage. On the first floor are found the parlors, offices, a dining hall with a seating capacity of four hundred fifty, a conservatory, social room, the kitchen, pantry, bakery, etc., and the living apartments for the dietitian. For beauty of architecture, completeness of equipment, comforts, and real home-like surroundings, Navarre Hall is one of the best dormitories in the state.

*The Heat and Power Plant* is a two-story brick building. Its boilers are on the first floor and have a capacity of four hundred fifty horse power. On the second floor of this building is located the Normal Steam Laundry.

## EQUIPMENT

*Laboratories*—The Science Department is provided with a large and well-appointed chemical laboratory, a physical laboratory with apparatus of the latest and most approved type, biological laboratory with an adequate supply of compound microscopes and materials for study, and a demonstration and lecture room.

*Libraries*—These consist of the Text-book Library and the General Reference and Loan Library, both located in Seminary Hall. The General Reference and Loan Library occupies a large room at the south side of the building on the first floor. The room is well lighted and is supplied with tables for reading and study. It is open from 8:00 a. m. to 12:00 m., from 1:00 to 4:30 p. m., and from 7:00 to 8:00 p. m. daily and is in charge of a trained Librarian. Students have access to the reference shelves and may obtain books to be read or studied in their rooms subject to the regulations commonly adopted in well conducted libraries. The reading tables are supplied with daily and weekly papers and the principal magazine and educational journals of the country. Various activities helpful to the students are carried on in connection with the regular work of the Library. A course in library work is given each year to the Senior Class. The course includes classification of books, use of the card catalog, magazine indexes and dictionaries, and talks on children's literature, school libraries, etc.

For the purpose of reading reference, the General Library has been arranged and catalogued according to the Dewey Decimal System of classification.

The text-book Library is in charge of the Registrar. It contains a supply of all the text-books used in the school, in sufficient number to meet the demands of the students for text-books to be used in preparing for recitations.

*Gymnasium*—The gymnasium is provided with dressing rooms, lockers, shower baths, Indian clubs, dumb-bells, wands, horizontal bars, traveling rings, etc.

*Manual Training*—A practical type of manual training is taught, which is especially adapted to the needs of those who expect to teach in the rural schools.

*Domestic Science*—A complete domestic science equipment is in use. A kitchen with all necessary apparatus accommodates twenty-four students at one time. The Dining Room tastefully furnished, affords the students ample opportunity for a course of instruction in serving.

*Radio Receiving Station*—A complete Westinghouse radio receiving station has been installed in Seminary Hall. Any day during the week students may listen to concerts by famous artists, lectures by prominent men and women, news reports, etc.

*Music Department*—The music department is supplied with nine upright pianos, two grand pianos and other necessary instruments, besides charts and other equipment for instruction purposes

*Teachers' Parlor*

## CHARACTER AND PURPOSE OF THE SCHOOL

### *The Normal School*

The specific purpose of the Normal Schools of the State of Pennsylvania, according to the statutes by which they were constituted state institutions, is the professional training of young men and women as teachers for the common schools of the state. The Normal Schools are, therefore, professional schools. In framing the course of study, recognition has been given to the fact that the teacher needs a substantial basis of intellectual training. It is self-evident that the teacher must have a thorough knowledge of the subjects which he is expected to teach.

A teacher should know more than he is required to teach. He should be able to examine the studies of the school curriculum in the light of more advanced knowledge. Nor is it sufficient that one who aspires to teach should have acquired a certain amount of knowledge in school. He must be able to continue his acquisitions, to add to his store of knowledge by his own efforts, after he has assumed the responsibilities of his profession. The teacher, should, therefore, possess the power to acquire and to assimilate knowledge, power to think and to systematize his acquisitions, according to logical relations, and power to give appropriate expression to his thoughts and opinions. To attain such power, intellectual training more extensive and thorough than that which is given in the elementary public school, or in the ordinary high school, is required.

But scholarship alone does not make a teacher. Professional training is essential. Accordingly the Normal School makes provision for instruction in the principles which underlie all good teaching, and for practical training in the art of teaching. Practical training in the art of teaching is provided for in the Training School. The law requires all students who expect to be graduated in the normal course to teach in the Training School fifteen hours per week for a full semester of eighteen weeks.

### *The Secondary School*

Many students who have not had the advantages of a high school course of four years and those who have attended high schools which do not give adequate preparations for normal school are given an opportunity to complete their preliminary education in the Secondary School of this institution.

All the advantages of the best preparatory schools are offered. The influences of the school are wholesome and tend to give prospective normal school students high ideals of school life.

The Secondary School is conducted only for those who do not have similar advantages available in their home communities.

### *Normal School Certificates for Teachers in Service*

The following conditions apply only to experience secured in Pennsylvania Public Schools prior to July 1, 1933.

1. The fifteen units of high school work required for entrance to the state normal schools may be earned in approved high schools, summer schools, extensions classes, correspondence study, and tutoring under approved conditions.

Credits for entrance may also be secured by teaching experience in Pennsylvania Public Schools at the rate of three standard high school units for each year of successful teaching.

2. Whenever a teacher has earned the credits necessary for entrance to a state normal school in any of the above ways or by a combination of them, four semester hours of credit on a regular state normal school curriculum may be granted for each year of successful teaching subsequent to meeting the entrance conditions up to a maximum of thirty-two semester hours, provided, however, that all credit thus given shall be conditional until the teacher shall have proved his ability to do the work of the state normal school curriculum in a creditable manner.

3. In all cases in which normal school credit is given for teaching experience the work remaining to be done shall be selected by the authorities of the normal school to secure the best development of the student in teaching power.

4. A minimum of one-half year of continuous resident study shall be required of all candidates for graduation who are credited for teaching experience as outlined above.

5. Entrance and normal school credits based on teaching experience as outlined above will not be granted after September 1, 1927.

### *Practical Teachers' Department*

During the summer session of nine weeks, courses are conducted for teachers who hold temporary certificates and need additional training for service in the school room, and to satisfy the legal requirements for teachers' certificates.

### *Music Department*

The aim of this department is to give thorough instruction in instrumental and vocal music, to fit graduates for teaching, or for entrance in to the Junior Class of leading conservatories of music.

Students pursuing the regular normal school courses are permitted to take private lessons in voice, piano, music appreciation and orchestral instruments. Practical experience in the directing of assembly singing is given to those who desire it. The glee clubs, chapel choir, and the orchestra afford opportunities to those who are interested in musical work of that nature.

*Students' Parlor*

## CURRICULA FOR PENNSYLVANIA STATE NORMAL SCHOOLS

---

### REQUIREMENTS FOR ADMISSION

1. Graduates of approved secondary schools who can present evidence of having completed fifteen units of high school work will be admitted as regular students to the state normal schools.

2. A unit shall consist of not less than thirty-six weeks of work requiring at least four periods per week of not less than forty minutes per period or its time equivalent. (Subjects not requiring out-of-class preparation or study shall require double time in estimating the units.).

3. Credentials of all students entering the state normal schools shall be received and evaluated by the normal schools.

4. Adequate knowledge of the subject matter in the elementary subjects will be presupposed on the part of all students admitted to the normal schools.

5. Required units for admission:

English.....	3 units
Mathematics.....	1 unit
Science.....	1 unit
Social Studies.....	2 units
Elective.....	8 units
<hr/>	
Total.....	15 units

6. The holders of permanent and professional certificates will be given one unit credit toward admission as regular students to the normal schools for each subject of high school grade written on the certificate.

7. Advanced credit will be given for equivalent courses in approved teacher training institutions, but no student may obtain a normal school certificate without a minimum residence of one year.

8. For the present the normal schools shall, when necessary, conduct a secondary department of first class high school grade for those students who do not have similar high school facilities available in their home communities.

---

### *Students Must Select One of Four Curricula*

The four curricula that are offered to students have been organized upon the principle that teaching in the elementary schools can be classified into sufficiently definite types to require specialization. Each curriculum prepares for a specific type of teaching position.

The two years' work of groups I, II, and IV of the normal school is divided into four semesters and group III into six semesters. The work of the first semester is the same for all students. A large purpose of the work of the first semester is to acquaint students with the requirements for successful teaching in the different grades so that they may be able to decide intelligently in what grade or grades they prefer to teach. The course entitled "Introduction to Teaching," which includes observation and participation in the training school, is especially designed to aid students in a wise selection of a curriculum.

At the end of the first semester students are asked to select one of the four curricula for the purpose of specializing in a specific field of teaching. The work of each curriculum must be completed in its entirety. Students may be granted the privilege of changing from one curriculum to another only on condition that the prescribed courses of any curriculum so selected must be completed before a certificate of graduation is granted.

### *The Four Curricula*

- Group I.* Kindergarten-Primary—for teachers of Kindergarten and grades 1, 2 and 3.
- Group II.* Intermediate grades—for teachers of grades 4, 5 and 6.
- Group III.* Grammar Grades and Junior High School—for teachers of grades 7, 8 and 9.
- Group IV.* Rural—for teachers of rural schools.

Notes—Kindergarten—Primary Curriculum

\*This elective is provided so that students desiring to emphasize the sub-primary field may have an opportunity to take Kindergarten Theory, Kindergarten Materials in Methods, and observe in the Kindergarten.

\*\*Those who elect to teach in the sub-primary field should have the major portion of their teaching in that field.

History and Principles of Education	3	3			
Educational Measurements	3	3			
Physical Education	2	1			
Health and Hygiene in the Junior					
High School	3	3			
Free Elective	7	7			
	21	20			

**Notes—Junior High School Curriculum:**  
(a) One year of Algebra and one of Plane Geometry are required in order to specialize in Mathematics.

(b) Three years of Latin, including Cicero or two years of a modern foreign language, are required in order to specialize in a given foreign language.

(c) These courses are open only to those who have taken the corresponding courses listed in the Third Semester.

(d) Under "Free Elective" not more than three semester hours of Art, Music or Education may be offered by any school.

**Explanatory**

The curriculum provides that all who take it shall be qualified to teach English and at least two other subjects. The special fields such as Art, Music, Home Economics, Health Education, Commerce, Teacher-Librarian, etc., are not invaded.

The status of Geography as a Junior High School subject is, at present, not clearly defined. The use of the free elective as Geography, when taken with 12 hours of General Science, will make, with the six required hours in Geography, a satisfactory preparation for teaching the subject in the Junior High School,—thus adding a fourth subject to the list which the graduate will be prepared to teach.

In general, the use of the free elective in connection with the 12 hours in any elective subject will give a superior preparation in that subject. The free elective may also be used for Handwriting, Home Economics, Educational Measurements, or any other subject at the option of the several schools.

## ELECTIVES

All electives are taught from the professional point of view and are of college grade of work.

All electives are to be chosen with special reference to the group in which the teacher is preparing to teach and with the approval of the principal of the school.

Each normal school is required to offer at least one elective in each of the six groups of electives. Additional electives of similar grade may be offered at the discretion of the principal of the school.

## BRIEF DESCRIPTION OF THE COURSES OF STUDY

### *EDUCATION*

#### Introduction to Teaching.

The primary purpose of this course is to aid students in selecting a specific curriculum at the end of the first semester, and to imbue them with a strong professional spirit and high standards of professional ethics. It includes considerations of the different types of teaching service, the general aims of the public schools and, more specifically, the work to be accomplished by the primary, intermediate, junior high and rural schools respectively, a brief sketch of the characteristics of children in these different types of schools and the qualifications required of teachers to meet the needs of children at the different age levels in these different types of schools. The broad social aims of each type of school and its relation to the state are emphasized.

The instruction in this course is closely correlated with frequent visits of observation and participation in the training school.

#### Psychology and Child Study.

This is an elementary course of psychology combining the important topics of both general and educational psychology, and forming the basis of the specific courses in educational theory and practice. The chief topics considered are: (a) instinctive tendencies; (b) habit-formation; (c) memory, association (including localization of functions), and economy of learning; (d) the effective life; (e) the thought processes; (f) the extent and causes of individual differences among children, and the use of intelligence tests in determining them; (g) the treatment of exceptional children. About one-third of the course is given to the study of the characteristics of children at the different levels of growth.

One laboratory period each week is given to the observation of children. While this course is practically identical in all curricula, there is a differentiation in the observation of children and in the laboratory experiments, each group emphasizing the characteristics of children at the age level of its particular curriculum.

#### Kindergarten Theory.

This course deals primarily with kindergarten aims, purposes, technique, and equipment. Special attention is given to modern tendencies in kinder-

Students' Room

garten practice, and particularly to the relation of the kindergarten to the primary grades. Observation and participation in the training school is a prominent feature of the course.

## The Teaching of Primary Subjects.

This is a complete course, including the best modern primary methods in number, geography, history and handwork. The first study is on the selection of materials and use of various courses of study for the subjects mentioned.

In number a study is made of proper type of games for motivating the drill work; various devices for drill; the diagnosis of individual needs; and the relation of time and efficiency in drills.

The aim in geography is to develop through observation and experience with environmental materials, the proper fundamental concepts which will be useful in later work. Each member of the class organizes a project which shows a correlation with all other primary subjects. This project must conform to modern practice and is one of the outstanding features of the course.

The history course makes a careful study of the story materials for this grade of work. It is a study of social situations aiming to give little children an intelligent grasp as far as their capacity permits, of the universal family idea; a view of the great world by a comparison of home relations; and to sow the first seeds of patriotism.

A text on handwork is studied. An outline for handwork is developed, examples of material are made in class, and much outside material is collected.

A special study is made of the use of pictures in primary work, and of preparing programs for special days and occasions.

## History and Principles of Education.

This is an interesting course and aims to bring together and interpret the details of educational theory and practice represented by the preliminary courses, and to leave with the student a unified body of educational doctrine. The course begins with a brief review of the origin and development of present day practices and tendencies in public school education, the large emphasis being placed on these movements that have originated, or at least have come into prominence, since the time of Rousseau. The discussion of such topics as: the aims and purposes of education; the development of various conceptions of educational values; and the history and present status of such educational movements as; vocational education; the treatment of backward children; scientific measurements; the junior high school; the doctrine of interest; formal discipline; the transfer of learning; project and problem teaching; and the socialized recitation.

## Student Teaching, School Efficiency and Conferences.

**The Training School.** The training school is the pivotal point of all the work of the normal school. It functions as a laboratory for every department of the school and articulates with peculiar intimacy with the Department of Education.

**Observation and Participation.** Although student teaching is confined to the senior year, junior students are given frequent opportunities for participation in the work of the training school and observation of expert teaching in the training school is a feature of all the courses in education and of many other courses throughout the curricula. One critic teacher is assigned to each two class rooms, and demonstration lessons are taught from time to time in exemplification of the various phases of good educational practice.

**Distribution of Time.** A minimum of two consecutive sixty-minute periods per day for one semester is given to student teaching. Where two student teachers are assigned to the same class in the training school the assignments are so adjusted that each student teacher has a definite problem. The distribution of teaching time is designed to give progressively to the student and increasing class responsibility.

**Lesson Plans.** Plan forms are used, upon which all lessons taught by student teachers are planned. Critic teachers hold daily conferences with the student teachers under their charge and approve all lesson plans of student teachers before the lessons are taught.

**Student Teachers.** Every student teacher confines his teaching to the grades of the group which he has elected. Student teachers electing group I and II have practice experience in all the subjects of the curriculum and, if possible, in all the grades of the group. Student teachers electing group III confine their practice teaching largely to the subjects in which the student has elected to specialize and, if possible, have practice teaching in all the grades of the group. Student teachers electing group IV confine their practice teaching largely to the rural one-room ungraded school and have opportunity for contact with the community problems. All assignments for student teachers contemplate the completion of a unit problem.

**Training Classes.** Training classes aim to have not less than twenty nor more than thirty pupils; that is, enough pupils to set up a normal social situation and yet not so many as to unduly tax the limited skill of the teacher.

**The Pupils.** The pupils in the training school by reason of the careful planning of each lesson and the close supervision of expert teachers, as well as through the use of abundant and elaborate equipment of the normal school are most favorably situated to secure the best possible education.

**School Efficiency.** The work in school efficiency presents many of the important problems of a modern elementary school. The principal topics developed are as follows: class room mechanics including lighting, heating, ventilation, seating of pupils, arrangement of materials and equipment, the keeping of records; class management and general matters of discipline; study of individual pupils; the lesson assignment, supervised study, home study, and the most approved methods of conducting the lesson; the practical application of standard tests and measurements. The discussions are based largely upon the work found in the training school and in other schools visited.

**Daily Conferences.** The training teacher holds daily conferences with the student teachers under her care. The purpose of these conferences is to offer constructive criticism and to outline the work for the following day.

**Weekly Conferences.** Each Saturday the training teacher meets all of the student teachers under her care. In these conferences the problems of individual teachers are discussed, and a study is made of the educational principles involved in the type of class room work required.

## *ENGLISH AND FOREIGN LANGUAGE*

### *ENGLISH*

#### *English 1—English Fundamentals.*

The purpose of this course is to acquaint the student with the source of material in English and the forms of correct expression.

A definite standard of written and spoken English must be acquired and maintained by all students. Further work in English without extra credit will be required of all who fail to reach and maintain this standard.

A few periods of instruction are given in the method of classifying and cataloguing books and in the use of reference books, readers' guides, etc.

About a third of the time of the course is devoted to a thorough review in the basic principles of English grammar, and special attention is paid to the structure of sentences and the syntax of their various parts. The course includes a brief history of the language and the principles underlying its development.

About a sixth of the time of the course is devoted to a study of words including pronunciation, diacritical markings based on a generally recognized system of phonetics, and attention is paid to basic principles in etymology.

*BASKET BALL—Normal School Champions for Western Pennsylvania*

## English Composition.

This course includes a thorough study of the forms of English prose composition together with much practice in writing. The four types of English prose; narration, description, exposition, and argumentation are carefully studied and analyzed with reference to form, content and technique. Special attention is given to the essay and the short story as media of prose expression and students are required to write frequent themes illustrative of the various forms discussed. These are made the subject of class criticism and discussion. The teacher in charge of the class meets the students from time to time for personal consultation.

## Oral Expression.

This course is designed primarily to insure (1) a good teaching voice and (2) effective address with facility and ease in oral expression.

## The Teaching of Primary Reading.

The primary aim of this course is to enable the student to acquire skill in the teaching of reading to beginners, including the development of skill in the use of phonetics. The course includes a comparison of the principal methods of teaching reading, and the historical development of various methods of teaching reading is traced. Consideration is given to the psychological processes involved in reading. The student acquires familiarity with the means of measuring efficiency in reading. This course is accompanied with observations of primary reading classes as well as the actual teaching of reading.

## The Teaching of English.

The course entitled "The Teaching of English" is very comprehensive, as the name indicates. The aim of this course is to present to the teachers of the intermediate grades all the material available for the teaching of oral and written composition together with the best and latest methods of vitalizing class room procedure.

Half of the course is devoted to the more mechanical phases of English teaching, which are considered essential as a background for good oral expression and correct written forms. Emphasis is therefore placed upon the teaching of spelling, punctuation, sentence structure, and certain necessary language facts falling under the term good usages. To this part of the work also belong exercises in dictation, memorization and the study of words.

The most approved methods of correcting common errors in oral and written English are carefully examined, and several weeks are spent in the study and use of the leading standard tests now published for measuring the results of English teaching.

## The Teaching of Reading.

The aim of this course is to enable the student to acquire skill in the teaching of reading to beginners and the handling of the technique of silent reading with older pupils. Attention is given to the development of skill in the use of phonics. Consideration is given to the psychological processes involved in reading. The student acquires familiarity with the means of measuring efficiency in oral and silent reading. The course includes a comparison of the principal methods of teaching reading and is accompanied with observations of oral and silent reading classes as well as the actual teaching of such classes.

## Children's Literature and Story Telling.

This course involves the collection and study of literature in verse and prose suited to children of this age. The selections are studied for the purpose of finding the elements contained therein that are likely to appeal strongly to children. The study of folk tales and fairy stories is included in this course.

The course in story telling covers the principles involved in telling stories to children. It involves also the application of the principles of child psychology and voice training to the telling of stories.

## Juvenile Literature.

This course is planned to give a foundation for teaching literature and silent reading to pupils of the intermediate grades.

It aims to give an adequate knowledge of those literary types that are most suitable for children of this age.

Magazines and current literature are studied and selections made from these sources as well as from standard authors.

A study is made of the difficulties that children meet in their effort to comprehend thought from the printed page. Students are made familiar with the scientific measurements of silent reading.

# MATHEMATICS

## The Teaching of Arithmetic.

This course aims to develop a systematic presentation of the facts and principles of arithmetic with special emphasis upon the topics that are most significant in the work of the intermediate grades. The treatment illustrates at every step the most effective methods of teaching arithmetic. Attention is given to the results of the recent experiments in the psychological processes involved in teaching of arithmetic and to the measurement of efficiency in this subject by the standard tests and scales. Observation of the teaching of arithmetic in the intermediate grades is an essential part of the course.

## The Teaching of Arithmetic.

This course aims to present a systematic study of the topics in arithmetic that are found in the course of study of the rural school. A special effort is made to have students understand how to use the resources of the country in supplying opportunities for the application of arithmetic. Attention is given to the psychology of arithmetic and to the standard measurements in this subject. Observation is an essential part of the course.

## *SCIENCE*

### Nature Study.

The word nature study is used in a broad sense to cover all phases of elementary science adapted to all groups. This course aims to give the student a definite body of knowledge of common forms of environmental materials and to supply the principles that will guide him in selecting and using environmental materials wherever he may be located. The course includes as wide a range of observation as possible of materials which the prospective teacher may be called upon to use in his work. Field trips are supplemented by laboratory study. For teachers of the upper grades a differentiation is made in favor of materials that supply the basis for further scientific study especially in the field of biology.

### The Teaching of Geography.

This is a general course in geography given from the standpoint of man's reaction to his environment and aims to co-ordinate fundamental principles of geography. The course is developed from the viewpoint of causal relations rather than the mere enumeration of facts and principles. As far as time permits some study is made of regional geography as a type of further application. Students get training in the organization and the presentation of geographic data through the use of the project and problem method; in the preparation and the use of maps, graphs, diagrams, and other illustrative material; and in the problems and methods involved in teaching field geography. Students are made familiar with the use of standard educational measurements in geography. The observation of classes in the teaching of geography is a necessary part of the course. Such differentiation in the application of the above principles and methods is made for the different groups as the course of study in geography requires.

### Agriculture.

A large purpose of this course is to give to the teachers of rural schools an insight into and a sympathy with the basic industry of the rural population and to appreciate the larger aspects of this industry as related to our national welfare. The rural teacher is instructed how to relate a knowledge of agriculture to the experience of rural children with a view to motivating the teach-

*Guest Room*

ing of the common branches. Opportunity is offered for participation in agricultural projects so that teachers can initiate and supervise projects with their pupils. Through this course teachers come in touch with the leaders of agricultural improvement and learn of the available sources of information on agricultural subjects.

## *SOCIAL STUDIES*

### Teaching of History.

This course includes a study of such history as will equip students to teach the history of the intermediate grades as recommended by the state course of study. Observation of teaching in these grades is a feature of the course.

Attention is given to teaching civics in the intermediate grades. The course for the fourth and fifth grades centers around the idea of community co-operation emphasizing those who furnish us food, clothing, shelter, medical aid, light, transportation, protection, etc. The work for the sixth grade centers around the idea of industrial co-operation with emphasis upon vocational opportunities, study of community service through occupation, and the qualifications required for each occupation.

### Educational Sociology.

The aim of this course is to acquaint the student with the various factors of society in their relationships; to study the forms and the organizations of our social system; and to denote the progress as well as the tendencies of society. In all this work the educational application is used in order that the student will better understand the groups with which he will have to deal, both within and out of the school room. In the application work definite set rules of action are not worked out therefrom but the value and method of adaptability is emphasized. The course is not only to aid the student in fitting himself into society but to enable him to help others to do likewise.

### Rural Sociology.

The primary aim of this course is the inculcation in the minds of the students of a love for and just appreciation of the importance of a healthy, country life, and includes consideration of such topics as: defects of present day country life, treated constructively; the lack of rural pride and rural co-operation; land tenantry; migration from the country to the city and its causes; co-operative buying and selling; the need for scientific agriculture; the country home; the country church; good roads; and the country school as an agent in intellectualizing, socializing and spiritualizing country life.

## *ARTS*

### Art I., Art II.

The aim of this course is to enable students to teach the public school course of study in drawing including, the representation of common objects,

the elementary principles of design, lettering, composition, and color harmony in their application to dress, home, school, and community interests; to give students facility and confidence in their ability to draw and illustrate on the blackboard a wide range of school subjects; to develop appreciation of art and ability to teach pupils the appreciation of art including the study of pictures. Such differentiation is made in this course for the different groups as the course of study requires including the teaching of the elements of mechanical drawing for the upper grades.

## Handwriting.

At the beginning of this course the handwriting of students is measured by one of the handwriting scales and if they fall below the standard set for teachers they are put in special classes for practice. The time of this course is devoted largely to methods of teaching writing, and to developing skill in blackboard writing. Students are instructed in the results of the recent investigations in the psychology of writing. Through measuring their own handwriting and the handwriting of children, students become acquainted with the use of handwriting scales.

## Industrial Arts.

This course aims to instruct students in the use of various materials that will enable them to work out simple problems as they arise out of the daily necessities of food, clothing and shelter. Students learn to appreciate the problems that are within the interests of children and how such problems may be graded according to the child's control of technique. The course includes clay modeling, paper and cardboard construction and simple problems in wood and textiles. Students observe demonstrations of this work in the training school and participate in such work.

## Sewing.

The aim of this course is to enable students to teach simple stitches to pupils of the fourth, fifth and sixth grades and to handle projects in the making of various articles for personal and household use.

## Music. I.

This course presupposes a knowledge of the elements of music. The purpose of this course is to fit students to teach music in the public schools. The salient features of this course are: a treatment of the child voice, a study of the tonal and rhythmic problems of each grade, ear training, melody writing, and sight singing, a study of the song material adapted to each grade, the use of phonograph to develop musical appreciation.

## Music. II.

This course is a continuation of Music I. It takes up the study of Public School Music in its advancing forms. It embraces the work of the fourth

and fifth years in the public schools, including oral and written dictation, vocal and rhythmic drills, sight singing, and part singing. Observation and practice teaching are important elements of the course.

### Art Education.

The work of Arts I is continued in this course the emphasis being placed upon the methods of presenting problems to children; adapting of the problem to the different grades; results expected from the children; the use of the black-board in presenting a lesson; and practice in board work. Illustrative material is collected, the purchase, use and care of supplies studied.

Art History is studied as a background for Picture Study, thus giving the class a knowledge of where materials may be obtained for this work.

## HEALTH EDUCATION

### Personal and School Hygiene.

**Personal Hygiene**—The aim of this course is to secure in the students settled habits in the care of the body which will lead to stronger, healthier and more efficient lives. The course aims to have students understand the hygiene of posture, nutrition, clothing, exercise, fatigue, rest and sleep; the causes of ill health and disease together with their control and prevention. Only those facts of physiology and anatomy which have special significance for hygiene are considered. The instructor will hold personal conferences with students as a part of the course.

**School Hygiene**—The aim of this course is to equip the student with the knowledge of school and child hygiene necessary for a teacher. The following topics are included: normal growth and its standards; the ill effects of malnutrition, bad air, lack of exercise, excessive exercise, lack of proper rest, defective vision, defective hearing, adenoids, diseased tonsils; remedies for various defects and the best methods of treating them from the school standpoint; hygiene of program making; school sanitation including school furniture ventilation, heating, lighting, water supply, toilets, etc.; regulations of state and local boards of health; the problem of nutrition as applied to school children with laboratory exercises in food values and food preparation. Observation of good hygienic school conditions and of good hygiene teaching is an important feature of this course.

### Health Education.

**Two hours each semester—Physical Education**—floor work; apparatus; marching; rhythmic work, including clubs, wands, and folk dancing; games; athletics, including track and field events, tennis, hockey, hiking, skating, etc. Corrective work, including proper exercises for students unable to take regular gymnasium work.

**One hour each semester**—a graded course in health education including physical exercises and games arranged to meet the needs of children at various stages of development through the grades. Discussion of the different theories of play, and the management and equipment of playgrounds. First aid in emergencies is included.

*Dining Hall*

## SUMMER COURSES FOR TEACHERS

Courses of study for the following groups of students during the Summer Term of 1923:

### I. Regular normal students and "teachers in service."

**Regular Normal Courses** adjusted to a one-half semester basis, so that by taking a limited number of courses a student may secure a full semester's credit in the courses pursued.

### II. Those who have partially completed the requirements for a permanent certificate.

(a) Cultural group of branches—satisfied by the holding of a professional certificate.

(b) Professional group of branches—satisfied by four semester hours of general professional work for each subject except music, health and art.

(c) Special provision is made for the work in music, health and art.

### III. High school graduates preparing to teach for the first time.

A minimum of eight semester hours and a maximum of twelve semester hours from the following:

Subject	Semester Hours
Music.....	3
Art.....	3
Health.....	3
School Efficiency.....	3
Introduction to Teaching.....	3
Child Psychology.....	3
Teaching of Geography.....	3
Teaching of Social Studies.....	3
Teaching of Mathematics.....	3
Teaching of Reading.....	3
Teaching of English.....	3

### IV. Students of secondary grade who desire to complete their preparation for normal school entrance.

### V. Those who desire to enter the field of administration or increase their efficiency in the field.

For the benefit of such persons a **SCHOOL OF SUPERVISION** is maintained.

Modern public school administration demands a specialized training for principals and superintendents of schools.

An individual may be a very successful teacher and possess all the native abilities and personal characteristics of a successful principal, yet he may lack the knowledge of the technique of his work which today is a prerequisite to success.

*The Library*

# EXAMINATIONS AND DIPLOMAS

---

## SEMESTER EXAMINATION

Examinations are held by the Faculty at the close of each semester, for the purpose of determining to what extent students are succeeding in their work and of guiding the teachers in fitting their instruction to the needs of the pupils. Students whose record for the semester falls below a grade of D in two or more subjects are required to take more time than the schedule indicates for the completion of the course of study. Students who show a marked deficiency in any subject are required to take the subject a second time and are conditioned until the deficiency has been made up.

## TEACHERS' CERTIFICATES

The State Council of Education has adopted a new plan for the certification of teachers. Under the law as now in force there are five grades of certificates:

1. Emergency
2. Partial (Professional equivalent)
  - (a) Elementary
  - (b) Secondary
3. Standard (Normal School equivalent)
  - (a) Elementary
  - (b) Secondary
4. Normal
  - (a) Certificate
  - (b) Diploma
5. College
  - (a) Provisional
  - (b) Permanent

Qualifications for each certificate:

1. The Emergency Certificate is exactly what its name indicates and is intended only for emergencies, to enable the superintendent to fill positions when regularly certified teachers are not available, so that the schools may be kept open. This certificate is issued by the county superintendent without examination and no educational standard is required. It is good for three months, and at the end of this time if the emergency still exists and the teacher holding such certificate shows by proper credentials that he is qualified to teach, this certificate may be endorsed by the State Department of Education for the remainder of the year. The minimum salary on this certificate is \$75 per month.

2. The Partial Elementary Certificate requires graduation from a first class high school, or the equivalent, and eight semester hours of professional training. These eight semester hours of work can be done in one summer term at a state normal school. This certificate is good for one year and can be renewed by doing an additional amount of professional study. It must develop into some form of a standard or permanent certificate.

The Partial Secondary Certificate requires two years of college work, or the equivalent, including six semester hours of professional training. It is good for one year, to teach in the high school. It may be renewed by doing six semester hours of additional college work and must grow into some form of a permanent certificate. The minimum salary on the partial certificates is \$85 per month, and they are good only in the county where issued.

3. The Standard Certificate requires graduation from a four-year high school and two years of professional training, or the equivalent. This certificate is good for two years, and may be renewed and become permanent after four years of successful teaching. There are two classes of the certificate—the elementary and the secondary, each good to teach in the field as indicated. Some credit for teaching experience may be allowed to those now in service towards satisfying the requirements for this certificate.

4. The Normal Certificate requires graduation from a State Normal School, requiring a four years' high school course or the equivalent for admission, and a two years' course of study of college grade for graduation. (The normal school entrance requirements may also be met, for the present by five years of successful teaching experience). This certificate grows by successful teaching into the Normal Diploma which is permanent. Its field is the elementary or the junior high school.

5. The Provisional College Certificate requires graduation from college including eighteen semester hours of professional training. It is good for three years, may be renewed once, and with three or more years of experience grows into the Permanent College Certificate.

---

## HOW TO SECURE A CERTIFICATE TO TEACH

---

### A. *High School Graduates Desiring to Teach.*

High school graduates who have satisfactorily completed fifteen (15) high school units must complete not less than eight (8) semester hours of post-high school professional training for teaching, in order to be qualified for a Partial Elementary Certificate.

The necessary blanks may be obtained from a county or district superintendent or from the Teacher Bureau, Department of Public Instruction, Harrisburg, Pennsylvania.

Immediately upon graduation from high school the applicant should send to the Teacher Bureau, Department of Public Instruction, Harrisburg, Pennsylvania, under the same cover:

1. A Certificate Application blank, properly filled out.
2. An Approved Training Certificate blank for high school work, filled out by the principal of the high school.

As soon as the required amount of professional work has been completed the applicant should secure from the proper official of the institution attended an approved Training Certificate blank properly filled out and send it to the Teacher Bureau, Department of Public Instruction, Harrisburg, Pennsylvania.

The responsibility for submitting these several credentials to the State Department of Public Instruction rests with the teacher concerned.

Kitchen

B. *Holders of Professional Certificates.*

Applicants for Partial Elementary Certificates who hold Professional Certificates that expire during the year 1923 must have six (6) semester hours of post-high school professional training.

The necessary blanks may be obtained from a county or district superintendent or from the Teacher Bureau, Department of Public Instruction, Harrisburg, Pennsylvania.

At the very earliest opportunity there should be submitted to the Teacher Bureau, Department of Public Instruction, Harrisburg, Pennsylvania:

1. A Certificate Application Blank, properly filled out.
2. An Approved Training Certificate filled out by the proper official of each institution attended, indicating all post-high school professional training.
3. A Teacher's Rating Score Card filled out by each superintendent under whose supervision the applicant was taught.

The responsibility for submitting these several credentials to the State Department of Public Instruction rests with the teacher concerned.

C. *Holders of Partial Certificates.*

Holders of Partial Certificates which expire August 1, 1923, are not required to present further application for certification, but there should be submitted to the Teacher Bureau, Department of Public Instruction, Harrisburg, Pennsylvania:

1. A Teacher's Rating Score Card filled out by the superintendent under whose supervision they have been teaching, indicating a rating of "middle" or better.
2. An Approved Training Certificate indicating the completion of not less than six (6) semester hours of professional training, in addition to that already required for the former issue or renewal of a Partial Certificate or its equivalent.

D. *Holders of Partial Elementary Certificates applying for the Standard Certificate.*

Holders of Partial Certificates applying for standard certification by or before the beginning of the school term in the fall of 1923 should have submitted to the Teacher Bureau, Department of Public Instruction, Harrisburg, Pennsylvania:

1. A Teacher's Rating Score Card filled out by the superintendent under whose supervision they have been teaching indicating a rating of "middle" or better.
2. A Certificate of Approved Training showing the completion of the necessary number of semester hours to make up the seventy required for standard certification.

## GENERAL INFORMATION

---

*Chapel Exercises*, which are strictly undenominational in character, are conducted daily, and all students are expected to be present at these exercises, unless for some reason expressly excused by the Principal. Students are expected to make a choice of one of the churches in the town for regular attendance and to be present at the services in the church so selected at least once each Sunday.

## RELIGIOUS ADVANTAGES

*The Young Women's Christian Association and the Young Men's Christian Association* hold weekly prayer meetings on Wednesday evening, and a joint meeting of the Associations is held on Sunday evening. These Associations are composed almost entirely of students. They elect their own officers, and plan and conduct their own meetings. Students may freely attend the meetings, and all are invited to take some part in the exercises. The Associations have also organized Bible study groups with suitable leaders.

*In the Sunday Schools*, connected with the various evangelical churches in Clarion, classes have been formed especially for Normal School students. As far as possible these classes are conducted by members of the Faculty, who assume the responsibility of teaching in Sunday Schools as a personal religious duty.

## SOCIAL ADVANTAGES

*Informal Social Life*—In many important respects the Clarion State Normal School forms a community by itself. The faculty and students associate freely with one another, and there exists in this school none of that formalism which some teachers mistake for dignity. The students thus enjoy the benefits of frequent intercourse with maturer minds outside the class rooms, and they incidentally receive many suggestions for the improvement of their habits, or the refinement of their manners, without having occasion to suspect any disposition on the part of the Faculty to dictate in matters purely personal. Students are frequently invited by members of the Faculty to their homes, and they are made to feel that the teachers have an interest in their welfare beyond government of the school or the conduct of recitations.

*The Conservatory*

The Christian Associations hold a joint reception for new students each semester, and, as the officers of these Associations are generally elected from among the members of the higher classes, the spirit of friendly helpfulness has crystalized into a sort of tradition and is continued from year to year. Each class is permitted and encouraged to entertain the other classes in some simple manner as often as once a term, when the students who provide the entertainment are given full responsibility, within the limits of propriety, for planning their own form of reception.

*Literary Societies*—The students conduct their own literary societies, elect their own officers, arrange the programs for the weekly meetings, make their own criticisms and review of the exercises, and assume all responsibility for the success of the societies. Under certain conditions, however, the papers read in the society meetings may be presented for credit in the department of instruction. Special arrangements have been made by which credit may be allowed in the department of English for original essays which may be prepared to be read before the literary societies.

*Lectures and Entertainments*—For the benefit of the students and the citizens of Clarion, the School provides each year a series of four or more lectures or instructive evening entertainments. Payment of Enrollment Fee entitles a student to admission to the course. Special efforts are made to furnish entertainments of a high order of merit which may contribute to the permanent advantage of the students. Recitals are given by the special students in the music and expression departments. The school frequently has the privilege of entertaining as visitors, persons who have gained distinction in some line of public or professional activity, and who willingly accept an invitation to address the students in the chapel.

## ATHLETICS

*Athletic Sports* are given their due share of attention. The reason for the existence of most outdoor games is two-fold—the pleasure which people take in them, and the good which they do both morally and physically. Young people need and must have the outdoor life if they are to develop into physically efficient men and women.

*Most out-door games* not merely strengthen the limbs, give certainty to the movements, make skillful the hand, and sure the

eye, but also give a great command to the will over the body. It is for these reasons students are encouraged to take part in this phase of the school's activities.

*The Tennis Courts and Athletic Grounds* which are near the school are kept in first-class condition.

The athletics of the school are supervised by members of the Faculty and are liberally provided for by the Board of Trustees.

## ROOM AND BOARD

*In the Dormitories* the school provides mattresses and bedding in addition to the furniture of the room, but students are expected to furnish their own sheets, pillow cases, towels, table napkins, and toilet articles.

Upon engaging a room each student makes a deposit of \$1.50 as a guarantee against all unnecessary injury to the room or the furniture. This deposit is returned at the end of the term if no damage, other than that produced by ordinary use, has been done to the room or furniture.

Students in actual attendance at the close of any semester are given the preference in choice of rooms for the succeeding semester. Rooms will not be reserved beyond the first week of the semester unless by special arrangement. Students may be required to change their rooms at any time if the authorities of the school decide that such a change is necessary.

A deposit fee of \$5.00 is required at the time a room is reserved. This amount is deducted from the cost of room rent when the student registers. If the student does not register the fee is not returned.

*Board in Navarre Hall* is provided for students at a very low price. The large dining room on the first floor is conveniently arranged and is kept in most excellent condition. The kitchen and bakery are provided with all the latest improvements for convenience and perfection in cooking. Good, substantial food well cooked and properly seasoned, is provided in practically unlimited quantities. Competent and experienced persons look after the need of students who may for any cause require special consideration.

## SUGGESTIONS TO STUDENTS AND PERSONS EXPECTING TO BECOME STUDENTS

Persons desiring to enter the Clarion State Normal School as students should make application to the Principal at as early a date as possible.

The prompt attendance of students at the beginning of the session facilitates the organization of the school and is essential to the success of the students individually. Students are, however, permitted to enter school at any time. It is advisable for students who can remain only for a few weeks to come here for that time. Some advantages are always derived from even a brief attendance at a good school.

On arriving at Clarion, students should report at once to the Principal at his office in Seminary Hall. They will be assisted in selecting their studies by the Principal, or the Dean of the Faculty. They will then fill out an enrollment card, designating the studies selected, pay their bills, and obtain their books at the Book Store. They will then be assigned to their rooms.

After having been registered, students should call at the Principal's office and receive their identification cards. No student will be admitted to classes without an identification card.

No student may change his program of studies, without permission. If a change appears desirable, students should obtain at the office, Transfer Cards, which they will take to the Principal. He will advise as to change and will direct as to further action.

It is desirable that students should not plan for frequent visits home. Absence from the school necessarily prevents successful work, not merely because time is lost, but also because attention is distracted from study. For the same reason students should not have any collateral occupation or business interests. As a rule students are not permitted to take private lessons in any subject from persons not connected with the school.

## NORMAL SCHOOL DEPARTMENT

All fees are payable by the semester *in advance*. The rate for board, room and laundry for less than a full semester is \$7.50 per week.

# TABLE OF EXPENSES

(REVISED JUNE 1, 1923)

## NORMAL SCHOOL DEPARTMENT

Rent of Typewriter.....	18.00	9.00	.50	.50	4.50
Fee of Shorthand.....	18.00	9.00	.50	.50	4.50

No deduction from the semester rate will be made for a period of two weeks or less at the beginning or end of a semester.

Conditions of refund: There will be no refund of fees except for personal illness or equally urgent reason. In such cases the rate shall be 50 per cent. of the regular charge. Claims for a refund of payment on account of personal illness will be considered only on the presentation of a physician's affidavit certifying that the student is not physically able to continue in school. The conditions of refund should be clearly understood by the student at the time of registration, and no requests should be made for the suspension of these conditions.

A semester fee of \$10.00 is charged all students to defray the expense of nurse's salary, lectures and entertainments, athletic games, recreational features, and general welfare work.

The laboratory fees indicated above are charged for heat, light, and breakage incident to ordinary laboratory work.

At the beginning of the semester each student doing laboratory work shall make a deposit of \$5.00 as a protection to the school against individual breakage.

Infirmary service is free for a period of seven days or less. Thereafter the charge will be \$1.00 per day. Doctor's fees and medicine are paid for by the student. A fee of ten cents will be charged for each tray sent to a student's room.

An extra fee of fifty cents per week will be charged for rooms 69, 70, 72, 74, 76, 78, 84, 88, 90, 92, 94, 95.

An extra charge of one dollar per week will be made to students who desire to room alone.

Each student is permitted to have twelve plain pieces washed each week without extra charge. While great care is taken with all articles sent to the laundry, the school will not be responsible for their loss or damage.

No student will be registered unless the bills of the previous semester are paid. Diplomas and certificates of credit will not be issued to those whose bills are not paid.

## OPPORTUNITY FOR STUDENTS TO WORK AND DEFRAY THE EXPENSE OF AN EDUCATION

---

To assist a limited number of worthy students who desire to work and help defray the expense of an education, we are pleased to announce the following plan:

**Kinds of Work**—Dining-room Waiters, Janitor Service, Hall Work, Campus Work, Bell Ringers, Kitchen Work, Cafeteria Work.

**Conditions**—The work required will be clearly specified. Faithful and efficient service will be required at all times.

**Remuneration**—Twenty-eight hours of actual work each week will be sufficient to pay for board and room. The present price of board and room is \$7.00 a week. Students will be paid for the actual number of hours they are employed each week.

**Method**—Students will be paid in cash for the service they have rendered, and they in turn will pay their fees. Some students will earn more than enough to pay for board and room. Others may not earn enough. This will depend entirely upon the number of hours a given student works each week.

Each student will fill out a daily time slip and submit it to the proper official for approval.

**General Remarks**—The plan announced above is inaugurated solely for the benefit of worthy young men and women who desire an education, and the management is glad to operate the plan for the sake of those who desire this kind of help.

Further information will be given upon application.

# ENROLLMENT 1922-1923
